general construction companies**

# Who We Are

## A Brief Introduction of Power Line Engineering

Power Line Engineering Public Company Limited (PLE) was established on July 8th ,1988 by a group of engineers led by Mr.Swake Srisuchart and Mr.Amnuay Kanjanopas to engage in the services of design, engineering and installation of mechanical, electrical and plumbing systems (MEP) and civil construction for offices, hotels, complex and plaza buildings, hospital, factories and airport.

We, PLE as one of the leading construction companies in Thailand has undertaken successfully more than 770 projects including many notable projects of which each projects valuing in the range of THB 100 million to THB 14.0 billion in Thailand and overseas during the past years in line with the development of Thailand and the increased demand of various types of modern building construction.

# Our Significant Milestones

Established under  
the name of Power Line  
Engineering Co., Ltd.

1988

Awarded ISO 9002 quality  
standard from BVQI

Purchased ordinary shares of  
Unima Engineering Co., Ltd.  
to expand business into civil  
construction

2000

Awarded “Best Business  
Enterprise” in the area of  
safety, from Ministry of  
Labor and Social Welfare

Company listed in Stock  
Exchange of Thailand (SET)

2002

Being awarded 3 oversea  
building construction projects  
totalling value of USD 510 m.  
in Doha, Qatar

2005

Being awarded 5 stars Resort  
& Spa construction project  
totalling value of USD 175 M.  
in Dubai, UAE

2006

Completed the  
construction of  
Chamchuri Square  
project with totalling  
areas of 187,912 Sq.m.

2008

1998

Awarded “Thailand Best  
Contractor” from the Asian  
Federation of Electrical  
Engineering Contractor

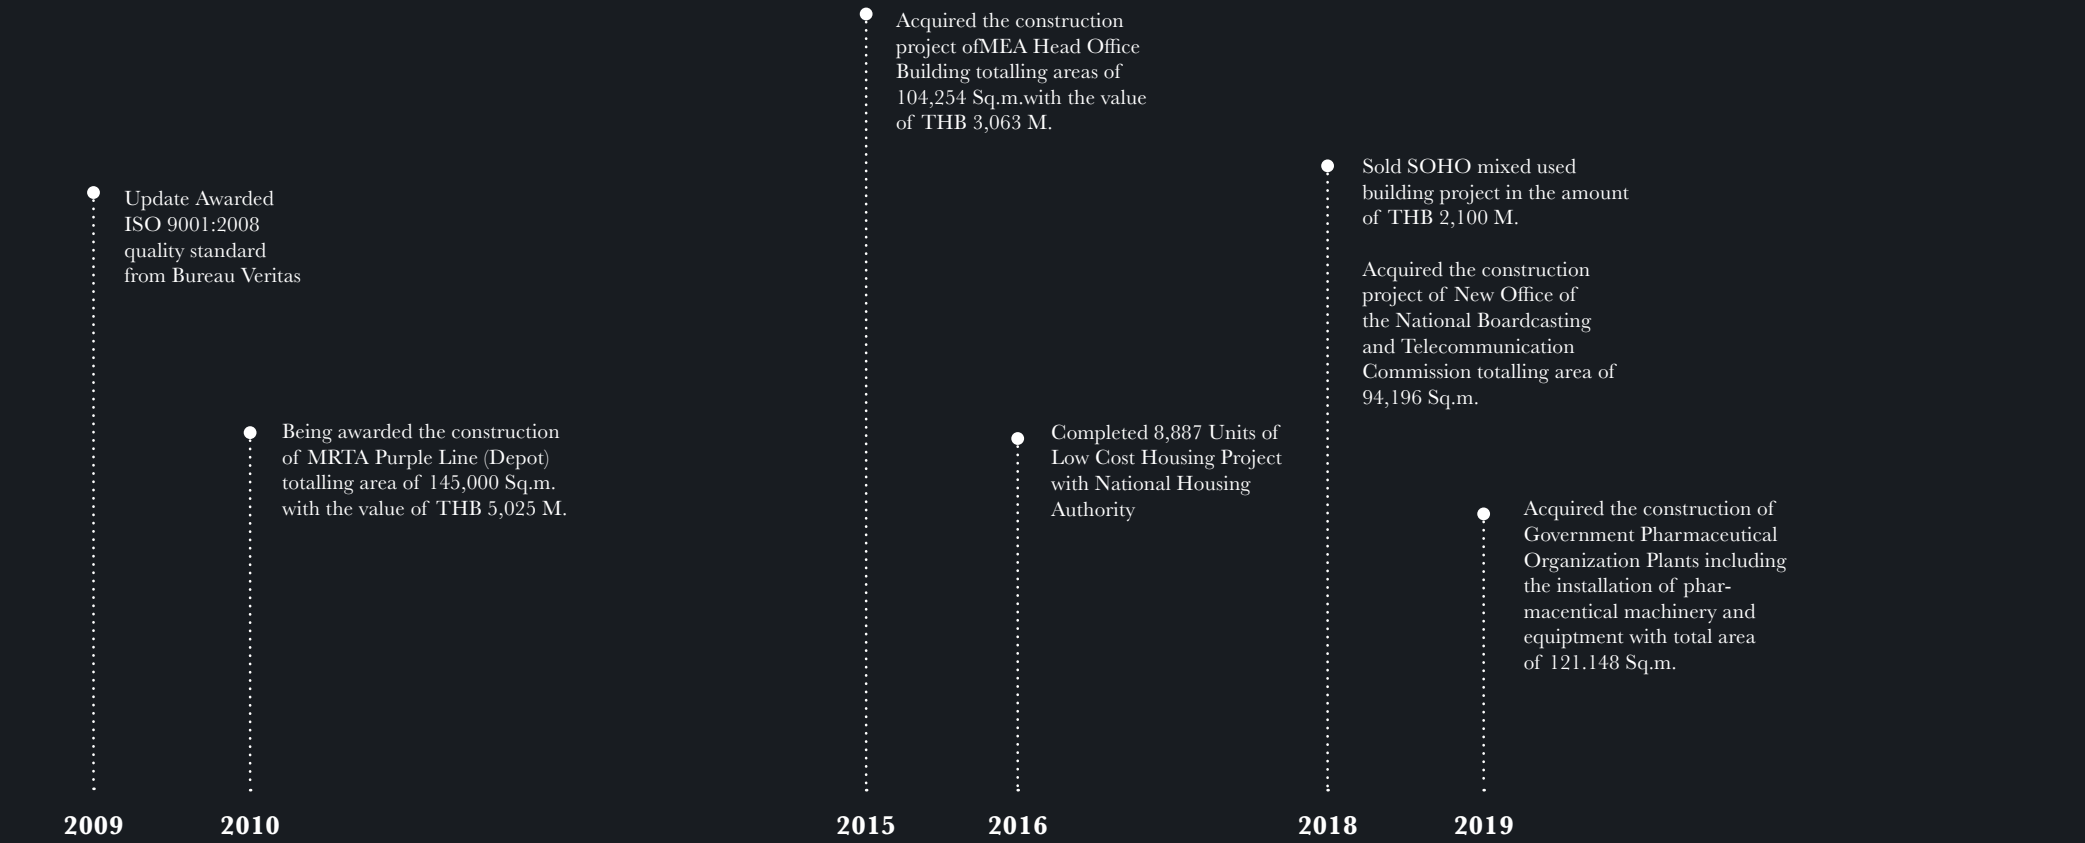

2003

Awarded ISO 9001:2000  
quality standard from  
Bureau Veritas

2007

Completed the construction  
of SOHO Mixed Used  
Building with 5 under-  
ground floors.

An aerial photograph showing a large-scale construction project. Several workers in high-visibility vests and hard hats are working within a large, rectangular concrete-lined pit. They are using tools to spread and level a thick layer of grey concrete. The surrounding ground is reddish-brown earth. In the bottom right corner, a metal rebar grid is visible, suggesting preparation for a concrete slab. The overall scene depicts a methodical and organized construction process.

**Enhance the effectiveness and efficiency of  
staffs and organization for performing work,  
which meet total customers' satisfaction as  
well as the public' recognition is our mission.**

# Nothing Impossible

## The insight of Suvarnabhumi Midfield Satellite Building 1

The construction and installation of facilities system of the First Midfield Concourse Building and the Connection to the Southern Tunnel (Sub-Structural Works) of Suvarnabhumi Airport (ZAT 1) which acquires the construction areas of 216,000 Square meters, 28 Bays for A-380 and Boeing-747 and fully equipped facilities for airport services. This ZAT 1 is also consisted of 28 passenger boarding bridges, visual docking guidance system, gate assignment, ICT and security systems and baggage handling system, connecting to the existing main passenger building. We are proud of our success in this challenging project, which we can complete it in time and are well regarded with the client's total satisfaction. There are some of the dramatic challenges which we would like to described as follows

# Suvarnabhumi Airport Midfield Satellite Building 1

Power  
Line  
Engineering

Public  
Company  
Limited

The Challenge of Concourse D Working Condition

---

# What Are the Main Challenges in Making this Airport?

The Challenge In Construction Condition

---

## Curved Roof Structure

- The curved roof structure required high precision for fabrication and installation.
- Main members of roof steel structure must be fabricated from abroad
- Complicated works especially curved architectural works and 5-stars interior works

Power  
Line  
Engineering

Public  
Company  
Limited

#### The Challenge of Concourse D Working Condition

---

## What Are the Main Challenges in Making this Airport?

#### The Challenge of Connecting to ZAT 1

---

## Concourse D Working Condition

- Odd working hours from 23.00 – 05.00 hrs.
- Renovation works at night and normal operation of AOT in the daytime
- Lots of regulation, paper works and tight security requirements
- Had to demolish the original MEP works
- Scope of works not clear

The Challenge of Project Scale

---

# What Are the Main Challenges in Making this Airport?

The Challenge of Project Scale

---

## Large Scale Projects

- Large scale project to accommodate up to 60 million passengers per year with limited construction period
- Working with many contractors at the same time and area (Interface and Co-ordination among several contractors)

#### The Challenge of Project Scale

---

# What Are the Main Challenges in Making this Airport?

#### The Challenge Of Integrated Monitoring and Controlling Systems

---

**Integrated monitoring system and controlling systems of a number of specialized system in order to facilitate airport specific processes**

Which consists of the following systems

- ICT Systems and security system including FIDS, CASS, FDAS and SMS
- Special building equipment and airport special system including AMS, PLB, VFGS and AMS
- MEP and fire protection systems for airport facilities including special device and equipment

# Building Information Modeling (BIM)

## **Plan**

Inform project planning by combining reality capture and real-world data to generate context models of the existing built and natural environment.

## **Design**

During this phase, conceptual design, analysis, detailing and documentation are performed. The preconstruction process begins using BIM data to inform scheduling and logistics.

## **Build**

During this phase, fabrication begins using BIM specifications. Project construction logistics are shared with trades and contractors to ensure optimum timing and efficiency.

## **Operate**

BIM data carries over to operations and maintenance of finished assets. BIM data can be used down the road for cost-effective renovation or efficient deconstruction too.

## 1 General Civil Construction

- Infrastructure
- Building construction
- Road Work
- Factory Plant
- Water Treatment Plant
- Power Plant
- Irrigation System

## 2 Electrical and Communication Systems

- Power Substation
- Power Distribution
- Electrical Power Supply
- Lighting System
- Telephone System
- Public Address System- Master Antenna
- Security System
- Lightning Protection System
- Building Automation System
- Energy Management System
- Solar Power System

# Everything Under One Roof

## 3 Air Conditioning and Ventilation Systems

- Air Conditioning System
- Ventilation System
- Refrigeration
- Clean Room
- Automatic Temperature and Humidity Control System
- Pressurized System
- Variable Air Volume System (VAV)
- District Cooling System

## 4 Plumbing, Sanitary and Fire Protection Systems

- Plumbing System
- Fire Alarm System
- Fire Pumps and Controller
- Fire Extinguishing Equipment
- FM200 System
- Water Treatment Plant System
- Waste Water and Sewage Treatment Plant
- Gas System
- Swimming Pool System

## 5 Telecommunication systems

- Telephone Network System
- Data Communication System
- TDMA/CDMA Telephone System
- SDH/Fiber Optic Communication Network System
- Self – Support, Guyed Mast Tower Antenna

# Revenues from Our Services

Power Line Engineering Public Co., Ltd. (PLE) operates business as the general contractor for the design, engineering and construction for civil, mechanical, electrical and all MEP works.

PLE's Business are summarized into 2 parts according to type and area of services, Civil Construction and Mechanical, Electrical & Plumbing System (MEP)

**55%**

MEP 4,718 MB.

**45%**

Civil 3,861 MB.

# Revenues from Our Services

# How We Work

## 1. Quality

Value for customers, employees and those involved with quality products and services from operational processes, technology development.

## 2. Time

Time equals money. Regardless of your role in a construction project, time is one of the most valuable assets at your disposal.

## 3. Cost

Expense incurred by a contractor for labor, material, equipment, financing, services, utilities, etc., plus overheads and contractor's profit.

# 1 Quality Management

## Quality Procedure of Project Management (ISO 9001:2015)

**Quality Policy :** “Leader in MEP System & Installation and Civil Work, as per International Standards, Impressive Service and Continued Work Development.”

### Quality Procedure Description

#### Preparation for Construction

QP-ENG-01	Construction Project Preparation and Installation	QP-WHC-01	Tools and Equipment Maintenance and Control
QP-MEP-01	Project Schedule and Report	QP-WHC-02	Tools and Equipment Maintenance and Control Incoming and Outgoing
QP-MEP-03	Project Budget Preparation and Control	QPWHC-03	Tools/Equipment And Maintenance
QP-ADM-01	Tools and Equipment Movement		Tools/Equipment Traceability and Identification
QP-PUR-01	Supplier/Sub-contractor Selection and Assessment		
QP-PUR-02	Purchasing		

#### Construction

QP-DWG-01	Shop Drawing, As-Built Drawing Preparation
QP-ENG-02	Design, Equipment Approval and Amendment
QP-ENG-03	Product Control Delivered by Customer
QP-ENG-04	Change operation agreement
QP-ENG-05	Nonconforming Products Control
QP-ENG-06	Corrective Action and Preventive
QP-ECV-01	Construction Work Control
QP-ECV-02	Construction Project Budget Preparation and Control
QP-ECV-03	Equipment Calibration and Testing Preparation
QP-ECV-04	Construction Work Testing and Inspection
QP-MEP-02	Work Installation Control
QP-MEP-04	Inspection and Testing
QP-MEP-05	Inspection and testing status
QP-SEV-02	Inspection, Measurement and Equipment Testing Control

#### Work Delivery & Guarantee

QP-ECV-05	Construction Project Completion Control
QP-MEP-06	Project Hand Over
QP-ENG-06	Corrective Action and Preventive
QP-SEV-01	Service

- Quality control point in project
- Inspection item of installation work
- Response person in Project Management
- Special process declaration (if required)
- Control of M/C Equipment used
- Safety procedure in installation work
- Qualification of all staffs must be elected base on their high performance and experience in project management skill
- Monitoring by Check sheet included detail of inspection, finding, report to construction management at least once a month
- Analyze risks and opportunities before starting work to determine how to eliminate them

## 2 Time Management

### **Break Down Structure**

- Analyze Critical Path of Work to set Master Schedule
- Focus on Critical Work in Master Schedule
- Prepare on related manpower/equipment in man-day, quantity suitably to each Critical Work
- Project monitoring every week to catch up working Schedule, property revise master schedule to appropriate work load

### **Management Lead Time**

of purchase Material / equipment that will affect to project schedule by expedition log that our Engineer will follow up on every material/ equipment delivery on time property

### **Co-ordinate with other-Trade**

for internal meeting to review over all progress of work

### **To conclude to find solution**

for Trouble/ problem that will affect to Project Schedule

### **Adjust/Revise sequence of work**

conform to Master schedule of project owner

### **Project Insurance**

to prevent risk that will occurs

### **Monitoring by**

- Progress of work (Daily Report)
- Weekly Report to conclude progress of work that achieves in each week compare with master schedule
- Catch up by revise weekly plan in critical path in manpower/equipment Resources Need in each system property by maintain consistent mile-stone in Master Schedule

## 3 Cost Management

- Earned Value Management (EVM)
- Cost Change Control System
- Performance Measurement
- Budget Control System of company
- Monitoring by Budget Update and Revised Cost Estimates

**Enhance the effectiveness and efficiency of  
staffs and organization for performing works,  
which meet total customers' satisfaction  
as well as the public' recognition.”**

# A Yeild of Achievement

## The Trust We Earn From Our Clients

During the past 30 years, we successfully completed more than 700 projects of various types of building for our valuable clients. Our great track record of quality works, delivering projects on time and acceptable and suitable cost together with after sales services which was supported by our professional engineering teams and skilled and experienced staffs ensured that our clients having the most satisfaction as well as PLE earning repeat orders from them. The development of engineering aspects and environmental care are continuously applied for our works delivering to both clients and public society. Hence, we are very grateful and proud to earn the trust of clients and public.

Bandoha, Qatar

A photograph of two workers in blue uniforms and yellow hard hats standing in a large industrial facility, looking into the interior of a massive, dark, cylindrical metal structure. The structure's interior is filled with a grid of small, glowing lights. In the background, another worker is visible inside the structure, and the factory's steel framework and high ceiling are visible.

**“ System Engineering Leader, standard  
installation, customer’s impression on  
services, and development of the work  
to international stage. ”**
